Honors Video Production

Introduction

Course Philosophy

The Honors Video Production curriculum fosters a student centered learning environment that allows students to use knowledge and methods of reading, writing, speaking, listening, history, and technology. Its primary goals are to address the developmental nature of each learner, promote critical thinking skills, foster communication, and make connections across the curriculum while infusing real life applications to develop students who are lifelong learners. We believe that critical thinking skills, research, writing, cultural appreciation and a strong knowledge base in technology are the building blocks of a successful career in the entertainment industry. Our goal is for students to achieve skills as critical thinkers, eloquent speakers, and technically savvy individuals as they develop a professional demeanor in the arts.

Course Description

The Honors Video Production course in the Fine and Performing Arts Academy’s Entertainment Technology program focuses on intermediate levels of framing and composition, editing, studio and field production, script writing, directing, live event production and film studies. Students use technology such as prosumer high definition video cameras, real time non-linear editing, DVD creation and digital computer graphic software, and portable lighting and sound equipment to give them a full technology-based education. This course provides students with a variety of activities that will enable him/her to understand and appreciate the application and value of entertainment technology by using up-to-date industry technology and techniques. Students will advance their knowledge of the stages of production, genres of videos and post production techniques.

| Unit 1 Field Production        | There are many steps to planning a successful production.  
A reliable and talented crew and cast will lead to a successful production.  
Different demographic audiences have different needs.  
An effective director knows how to communicate his needs to those he works with.  
One must consider many factors to determine the best way to sell one’s vision of a production.  
Employers look for efficient decision makers and problem solvers who are experienced and easy to work with.  
At the conclusion of this unit, students will be able to:  
Demonstrate knowledge of how to properly brainstorm ideas for a field production.  
Demonstrate knowledge of how to create a proper treatment.  
Understand the importance of targeting your audience.  
Create a presentation that caters towards a specific demographic and client.  
Demonstrate knowledge of proper presentation skills, including body language and public speaking.  
Demonstrate knowledge of the first two stages of production in a field production: pre-production, and set-up and rehearsal.  
Demonstrate knowledge of how to create a script and storyboard for an intermediate field production video.  
Understand the importance of a production schedule.  
Create numerous types of production schedules.  
Demonstrate knowledge of how to run a casting session.  
Understand the role of a strong leader in a group and the role of a strong group member. | 8 weeks              |
| Unit 2 Intermediate Field Production | It is important to know the equipment that is standard in your industry.  
There are many steps to planning a successful production.  
A reliable and talented crew and cast will lead to a successful production.  
An effective director knows how to communicate his needs to those with whom he works.  
Editing techniques can be purposefully applied to enhance a work of art and influence its message.  
Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with cooperatively.  
At the conclusion of this unit, students will be able to:  
Demonstrate knowledge of the last two stages of production in a field production; production and post production.  
Understand the role of successful crew member/director during production.  
Demonstrate knowledge of appropriate usage concerning prosumer digital video camera.  
Demonstrate knowledge of proper intermediate production techniques.  
Demonstrate ability to time manage in cooperation with production schedules.  
Create a full production video for the 8th grade orientation.  
Display an understanding of appropriate social and professional communication.  
Demonstrate how to use editing techniques as means of communication. | 8 weeks              |

<tbody>
<tr>
<td>Unit 4</td>
<td>Intermediate Editing Techniques</td>
<td>It is important to know the equipment that is standard in your industry. Different demographic audiences have different needs. Editing techniques can be purposefully applied to enhance the work of art and influence the message. One must consider many factors to determine the best way to sell one's vision of a production. Something visually appealing and interesting can be created by altering the standard presentation. Special effects are used to create illusions. Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with. At the conclusion of this unit, students will be able to: Demonstrate knowledge of intermediate editing techniques. Demonstrate ability to technically alter an image using editing techniques. Create a video that demonstrate creative use of depth planes with shot set-ups. Demonstrate knowledge of the evolution of the movie trailer. Create a recut movie trailer that changes the genre of the original movie.</td>
<td>2 weeks</td>
</tr>
<tr>
<td>Unit 5</td>
<td>Basic Special Effects Techniques</td>
<td>It is important to know the equipment that is standard in your industry. Editing techniques can be purposefully applied to enhance the work of art and influence the message. Something visually appealing and interesting can be created by altering the standard presentation. Special effects are used to create illusions. At the conclusion of this unit, students will be able to: Demonstrate knowledge of what current and past technology was used to create special effects. Demonstrate knowledge of how to use industry standard/prosumer editing special effects software. Create a special effects video using industry standard/prosumer editing special effects software.</td>
<td>1 week</td>
</tr>
<tr>
<td>Unit 6</td>
<td>Basic Stop Motion</td>
<td>There are many steps to planning a successful production. Editing techniques can be purposefully applied to enhance the work of art and influence the message. Something visually appealing and interesting can be created by altering the standard presentation. Sound can be used to enhance the emotion evoked from an audience. Viewing and analyzing other people’s work, as well one’s own gives insight into one’s art. At the conclusion of this unit, students will be able to: Demonstrate knowledge of the evolution of stop motion and key people in the industry. Demonstrate the ability to plan the production of an original stop motion video. Illustrate how to effectively use music and SFX’s to enhance a stop motion video. Create an original stop motion video using production and editing techniques.</td>

<tr>
<td>Unit 7</td>
<td>Basic Music Video Techniques</td>
<td>There are many steps to planning a successful production. A reliable and talented crew and cast will lead to a successful production. An effective director knows how to communicate his needs to those he/she works with. Editing techniques can be purposefully applied to enhance the work of art and influence the message. Something visually appealing and interesting can be created by altering the standard presentation. Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with. At the conclusion of this unit, students will be able to: Demonstrate knowledge of how to create a proper treatment. Demonstrate knowledge of the four stages of production in a field production: pre-production, set-up, and rehearsal, production and post production. Demonstrate knowledge of how to create a storyboard and location shot sheet for an original music video. Understand the importance of a production schedule. Create numerous types of production schedules. Create and follow numerous types of production schedules. Understand the role of a strong leader in a group and the role of a strong group member. Demonstrate knowledge of the evolution of music videos. Create an original music video using proper production and editing techniques.</td>
<td>3 weeks</td>
</tr>
<tr>
<td>Unit 8</td>
<td>Basic Documentary Techniques</td>
<td>There are many steps to planning a successful production. Different demographic audiences have different needs. Editing techniques can be purposefully applied to enhance the work of art and influence the message. One must consider many factors to determine the best way to sell one’s vision of a production. Sound can be used to enhance the emotion evoked from an audience. At the conclusion of this unit, students will be able to: Demonstrate knowledge of the different styles and elements of documentaries. Demonstrate knowledge of the four stages of production in a field production: pre-production, set-up and rehearsal, production, and post production. Demonstrate knowledge of how to write a script for a documentary. Understand the importance of a proper research. Demonstrate knowledge of the flexible scheduling and planning. Create an original documentary using proper production and editing techniques.</td>
<td>2 weeks</td>
</tr>
</tbody>
</table>
There are many steps to planning a successful production. A reliable and talented crew and cast will lead to a successful production. An effective director knows how to communicate his needs to those he works with. Editing techniques can be purposefully applied to enhance the work of art and influence the message. Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with.

At the conclusion of this unit, students will be able to:
- Demonstrate knowledge of the four stages of production in a field production.
- Demonstrate knowledge of how to properly brainstorm ideas for a field production.
- Demonstrate knowledge of how to create a proper treatment.
- Demonstrate knowledge of how to create a script and storyboard for an intermediate field production video.
- Understand the importance of a production schedule.
- Create numerous types of production schedules.
- Understand the role of a strong leader in a group and the role of a strong group member.
- Demonstrate knowledge of intermediate editing techniques.
- Create an original video of choice.

Viewing and analyzing other people’s work, as well one’s own gives insight into one’s art.

At the conclusion of this unit, students will be able to:
- Demonstrate the ability to give constructive criticism and discuss various works of art.
- Understand the importance of viewing works of art with an open mind.
- Create their own personal opinions about films that are considered great classics.
- Demonstrate knowledge of how technology has influenced filmmaking.
Enduring Understandings:
There are many steps to planning a successful production.
A reliable and talented crew and cast will lead to a successful production.
Different demographic audiences have different needs.
An effective director knows how to communicate his needs to those he works with.
One must consider many factors to determine the best way to sell one's vision of a production.
Employers look for efficient decision makers and problem solvers who are experienced and easy to work with.

Essential Questions:
What are the different steps in planning?
In what order do you complete the different steps?
Are there different ways to complete the planning steps?
What are the qualities of a reliable crew?
What do you look for in a talented cast member?
What is a demographic?
How do you cater presentations towards a specific demographic?
Why is it important to know your client's demographic audience?
What qualities does an effective director possess?
How does a director communicate effectively?
What are the different ways to communicate your idea?
How do you know which way is best to communicate your idea?
Which presentation skills are the most appropriate and necessary for this presentation?
How do you make efficient decisions?
What is problem solving?
What creates credibility in the field of production?

Unit Goals:
At the conclusion of this unit, students will be able to:
Demonstrate knowledge of how to properly brainstorm ideas for a field production.
Demonstrate knowledge of how to create a proper treatment.
Understand the importance of targeting an audience.
Create a presentation that caters towards a specific demographic and client.
Demonstrate knowledge of proper presentation skills, including body language and public speaking.
Demonstrate knowledge of the first two stages of production in a field production: pre-production, and set-up and rehearsal.
Demonstrate knowledge of how to create a script and storyboard for an intermediate field production video.
Understand the importance of a production schedule.
Create numerous types of production schedules.
Demonstrate knowledge of how to run a casting session.
Understand the role of a strong leader in a group and the role of a strong group member.

**LA.11-12.RST.11-12.2** Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.

**LA.11-12.RST.11-12.3** Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.

**LA.11-12.RST.11-12.4** Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11-12 texts and topics.

**LA.11-12.RST.11-12.6** Compare and contrast ideas from different texts; analyze how evidence in the text supports conclusions that the author draws; analyze and evaluate the contribution made by someone else’s work; compare personal experiences or prior knowledge to the information presented in the text.

**LA.11-12.WHST.11-12.4** Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

**LA.11-12.WHST.11-12.5** Develop and improve upon writing styles that are appropriate to task, purpose, and audience.

**LA.11-12.WHST.11-12.7** Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

**LA.11-12.WHST.11-12.9** Demonstrate ability to communicate the meaning of the data and its implications for solving problems, using multiple perspectives.

**AR.9-12.1.1.2.A.1** Determine how dance, music, theatre, and visual art have influenced world cultures throughout history.

**TEC.9-12.1.1.2.A.1** Produce and edit a multi-page document for a commercial or professional audience using desktop publishing and/or graphic software.

**WORK.9-12.1.1.2.A.1** Apply critical thinking and problem-solving strategies during structured learning experiences.

**WORK.9-12.1.1.2.A.2** Participate in online strategy and planning sessions for course-based, school-based, or outside projects.

**WORK.9-12.1.1.2.B.1** Present resources and data in a format that effectively communicates the meaning of the data and its implications for solving problems, using multiple perspectives.

**WORK.9-12.1.1.2.B.2** Create and respond to a feedback loop when problem solving.

**WORK.9-12.1.1.2.B.3** Assist in the development of innovative solutions to an onsite problem by incorporating multiple perspectives and applying effective problem-solving strategies during structured learning experiences, service learning, or volunteering.

**WORK.9-12.1.1.2.C.1** Enlist input from experts in the field, community members, and other stakeholders to design a service-learning activity that addresses a local, national, or worldwide need.

**WORK.9-12.1.1.2.C.4** Demonstrate leadership and collaborative skills when participating in online learning communities and structured learning experiences.

**WORK.9-12.1.1.2.E.1** Create messages for different purposes and audiences with sensitivity to cultural, gender, and age diversity, using various digital media outlets.

**WORK.9-12.1.1.2.F.2** Demonstrate a positive work ethic in various settings, including the classroom and during structured learning experiences.

**ITEC.9-12.9.4.12.C.1** Demonstrate knowledge and understanding of how technical production support can enhance audio, video, and film production systems.

**ITEC.9-12.9.4.12.C.2** Examine and summarize careers in this pathway to build an understanding of available opportunities.

**ITEC.9-12.9.4.12.C.4** Employ knowledge and skills related to video production equipment to demonstrate an understanding of basic tools used in this pathway.

**ITEC.9-12.9.4.12.C.6** Design an audio-video production to acquire an understanding of the entire production process.
Differentiation

When creating multimedia projects, students will have the freedom to choose from a variety of software/programs that meet their individual compositional needs.

In performance and presentation models, students can present the material in a manner/mode that best suits their individual comfort level with public speaking via software that allows for animated/virtual presentation.

Technology

All presentations in this unit incorporate technology as a means of effective communication. In both process and product, technology is treated as an essential component in video production. As much as budget and opportunity will allow, every effort will be made within this unit to incorporate new industry standards.

College and Workplace Readiness

An individual's ability to present themselves to potential employees, employers and/or clients is essential to success in the real world. This unit encourages and reinforces habits that lead to confidence in communication.

The ability to collaborate and work in a team to set and achieve deadlines is a skill that translates across subjects and disciplines.

Encouraging creative thinking, as well as more practical planning and organization, meets the needs of a variety of workplace readiness objectives.
2- Intermediate Field Production

Unit Plan

Enduring Understandings:
It is important to know the equipment that is standard in your industry.
There are many steps to planning a successful production.
A reliable and talented crew and cast will lead to a successful production.
An effective director knows how to communicate his needs to those he works with.
Editing techniques can be purposefully applied to enhance the works of art and influence the message.
Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with.

Essential Questions:
What is an industry standard?
What equipment is currently industry standard?
What are the different steps in planning?
In what order do I complete the different steps?
Are there different ways to complete the planning steps?
What are the qualities of a reliable crew?
What do you look for in a talented cast member?
What qualities do effective directors possess?
How does a director communicate effectively?
What are the differences between basic editing techniques and intermediate editing techniques?
Does editing software change the kind of editing techniques that can be accomplished?
How do you make efficient decisions?
What is problem solving?
What creates credibility in the field of production?

Unit Goals:
At the conclusion of this unit, students will be able to:
Demonstrate knowledge of the last two stages of production in a field production: production and post-production.
Understand the role of successful crew member/director during production.
Demonstrate knowledge of appropriate usage concerning prosumer digital video camera.
Demonstrate knowledge of proper intermediate production techniques.
Demonstrate ability to time manage in cooperation with production schedules.
Create a full production video for the 8th grade orientation.
Display an understanding of appropriate social and professional communication.
Demonstrate how to use editing techniques as means of communication.

Recommended Duration: 8 weeks

LA.11-12.RST.11-12.2 Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.
LA.11-12.RST.11-12.3 Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.
LA.11-12.RST.11-12.4 Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11-12 texts and topics.
LA.11-12.RST.11-12.5 Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.
LA.11-12.RST.11-12.6 Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.
LA.11-12.RST.11-12.10 By the end of grade 12, read and comprehend science/technical texts in the grades 11-CCR text complexity band independently and proficiently.
LA.11-12.WHST.11-12.1.a Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.
LA.11-12.WHST.11-12.1.b Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.
LA.11-12.WHST.11-12.1.d Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.
LA.11-12.WHST.11-12.1.e Provide a concluding statement or section that follows from or supports the argument presented.
LA.11-12.WHST.11-12.1.f Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LA.11-12.WHST.11-12.5 Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LA.11-12.WHST.11-12.7 Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LA.11-12.WHST.11-12.9 Draw evidence from informational texts to support analysis, reflection, and research.
AR.9-12.L.12.1.2.A.1 Determine how dance, music, theatre, and visual art have influenced world cultures throughout history.
AR.9-12.L.12.1.2.A.2 Justify the impact of innovations in the arts (e.g., the availability of music online) on societal norms and habits of mind in various historical eras.
AR.9-12.L.12.3.1.D.2 Produce an original body of work in one or more art mediums that demonstrates mastery of visual literacy, methods, techniques, and cultural understanding.
AR.9-12.L.12.3.1.D.3 Organize an exhibit of personal works of visual art that convey a high level of understanding of how the expression of ideas relates to the art media, art mediums, and techniques used.
AR.9-12.L.12.3.1.D.4 Analyze the syntax and compositional and stylistic principles of two- and three-dimensional artworks in multiple art media (including computer-assisted artwork), and interpret themes and symbols suggested by the artwork.
TEC.9-12.8.1.12.A.2 Produce and edit a multi-page document for a commercial or professional audience using desktop publishing and/or graphic software.
TEC.9-12. The use of digital tools and media-rich resources enhances creativity and the construction of knowledge.
WORK.9-12.9.1.1.2.D.1 The ability to recognize a problem and apply critical thinking and problem-solving skills to solve the problem is a lifelong skill that develops over time.
WORK.9-12.9.1.1.2.D. A.1 Apply critical thinking and problem-solving strategies during structured learning experiences.
WORK.9-12.9.1.1.2.D. A.2 Analyze the common traits of effective state, national, or international leaders.
WORK.9-12.9.1.1.2.D. C.4 Demonstrate leadership and collaborative skills when participating in online learning communities and structured learning experiences.
WORK.9-12.9.1.1.2.D. C.5 Assume a leadership position by guiding the thinking of peers in a direction that leads to successful completion of a challenging task or project.
WORK.9-12.9.1.1.2.D. E.1 Create messages for different purposes and audiences with sensitivity to cultural, gender, and age diversity, using various digital media outlets.
WORK.9-12.9.1.1.2.D. F.2 Demonstrate a positive work ethic in various settings, including the classroom and during structured learning experiences.
ITEC.9-12. 9.4.12.C.1 Demonstrate knowledge and understanding of how technical production support can enhance audio, video, and film production systems.
ITEC.9-12. 9.4.12.C. 2 Examine and summarize careers in this pathway to build an understanding of available opportunities.
ITEC.9-12. 9.4.12.C.3 Employ knowledge and skills related to video production equipment to demonstrate an understanding of basic tools used in this pathway.
ITEC.9-12. 9.4.12.C.4 Employ knowledge and skills related to video production equipment to demonstrate an understanding of basic tools used in this pathway.
ITEC.9-12. 9.4.12.C.5 Edit audio and video productions to demonstrate basic production system skills.
ITEC.9-12. 9.4.12.C.6 Design an audio-video production to acquire an understanding of the entire production process.
**Differentiation**

Opportunities to research can be easily differentiated for students of varying levels by allowing individual time frames in accordance with pacing and ability and providing reading materials at a variety of Lexile levels.

Students who learn through movement and visualization will learn from the improvisation scenarios while those who need auditory reinforcement will benefit from class discussion.

Students will have an opportunity to participate in a variety of roles and positions that each speak to different personal strengths and skills.

**Technology**

Creating and editing with digital video cameras and editing software allows students to use technology as a method of communication as well as entertainment and information.

**College and Workplace Readiness**

Research in a variety of journals and industry guides translates to habits of inquiry that are valuable in any scholarly or vocational endeavor.

The ability to recognize appropriate indications for the use of specific terminology affords the students opportunities to practice a variety of communications which will benefit them in whatever industry they are employed.

Setting, revising, and meeting deadlines are essential skills for success both in an academic setting and in the workplace. The ability to acknowledge when deadlines can and cannot be adjusted allows for the individual to establish habits of work ethic that are helpful in any real world scenario.

Social and professional communication skills are essential to confidence in both academic and work settings. Understanding the difference between types of communication allows the student to define his or her own means of relaying messages to peers and superiors alike.
3 - Intermediate Filming Techniques

Unit Plan

Enduring Understandings:
It is important to know the equipment that is standard in your industry.
Something visually appealing and interesting can be created by altering the standard presentation.
Special effects are used to create illusions.
Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with.

Essential Questions:
What equipment is currently industry standard?
What is visually appealing?
How can I alter the image?
What are illusions?
How do you make efficient decisions?
What is problem solving?
What creates credibility in the field of production?

Unit Goals:
At the conclusion of this unit, students will be able to:
Demonstrate knowledge of filming techniques used to create point of view shots.
Demonstrate ability to effectively use point of view shot set-ups to enhance a video.
Demonstrate knowledge of the depth planes.
Illustrate how to effectively use the depth planes when filming to create illusions.
Create a video that demonstrates creative use point of view shot set-ups.
Create a scene that demonstrates creative use of depth planes with shot set-ups.

Recommended Duration: 3 weeks
<table>

</tr>
</tbody>
</table>
Differentiation

While the video must demonstrate an understanding of various concepts, the nature of the creative process lends itself to varying degrees of ability. The process itself can be differentiated according to comfort and ability with equipment. Additionally, students can create maps and schedules on their own time after school. In cases where school editing equipment and cameras must be used, students can have access to the studio before and after school.

Technology

Students can view additional videos and tutorials to help gain a greater understanding of the assignment and tasks. Additionally, viewing other sources can inspire and motivate the students to use technology in new and inventive ways.

College and Workplace Readiness

The creative processes contained within this unit foster an "outside of the box" approach to thinking that is necessary to success in the real world. The ability to see beyond a presented reality is an invaluable asset to any future employee. Organizations, especially those in the field of technology, seek out candidates who are comfortable working within set guidelines, but who are also equally at ease challenging conventions and establishments when necessary.
4 - Intermediate Editing Techniques

**Unit Plan**

**Enduring Understandings:**
- It is important to know the equipment that is standard in your industry.
- Different demographic audiences have different needs.
- Editing techniques can be purposefully applied to enhance the work of art and influence the message.
- One must consider many factors to determine the best way to sell one's vision of a production.
- Something visually appealing and interesting can be created by altering the standard presentation.
- Special effects are used to create illusions.
- Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with.

**Essential Questions:**
- What equipment is currently industry standard?
- How do you cater presentations towards a specific demographic?
- What are the differences between basic editing techniques and intermediate editing techniques?
- Does editing software change the kind of editing techniques that can be accomplished?
- How can different editing techniques change the genre and message of a video?
- What are the different ways to communicate your idea?
- How do you know which way is best to communicate your idea?
- What is visually appealing?
- How can I alter the image?
- What are special effects?
- What are illusions?
- How do you make efficient decisions?
- What is problem solving?
- What creates credibility in the field of production?

**Unit Goals:**
- At the conclusion of this unit, students will be able to:
  - Demonstrate knowledge of intermediate editing techniques.
  - Demonstrate ability to technically alter an image using editing techniques.
  - Create a video that demonstrate creative use of depth planes with shot set-ups.
  - Demonstrate knowledge of the evolution of the movie trailer.
  - Create a recut movie trailer that changed the genre of the original movie.

**Recommended Duration:** 2 weeks
<table>

<td>Illustrate ability to problem shoot and use user manuals to solve production problems</td>
<td>Internet access</td>
<td></td>
<td>Use of resources</td>
</tr>
</tbody>
</table>
Students have the opportunity to choose the type of movie trailer that they would like to work, as well as the genre to which they would like to adapt their trailer. Students have freedom of choice over the elements they will change in addition to the techniques they will use to make those changes. The amount of changes made as well as the techniques used may be influenced by the individual student’s level of ability with the editing software. Students then have the opportunity to use a variety of resources in order to solve problem.
**Technology**

Students will be learning how to use editing software and manipulate technology. This applies not only to the trailers with which they will be working, but any type of editing project one might come across. They will use the internet and other technological resources and manuals in order to problem solve.

**College and Workplace Readiness**

Research, editing, and problem solving are important skills for students to acquire and practice for any field of study or work. In this unit, students must identify their audience in order to make appropriate decisions. They then must complete research; the ability to locate appropriate, applicable information is important in any field. Editing one's work, being able to evaluate choices made, and being open to change are important assets to have. The ability to work with others in order to problem solve and accomplish a goal is a necessary skill for all workplaces. Time management is vital not only in the workplace, but also in our daily lives.
5 - Basic Special Effects Techniques

Unit Plan

**Enduring Understandings:**
It is important to know the equipment that is standard in your industry.
Editing techniques can be purposefully applied to enhance the work of art and influence the message.
Something visually appealing and interesting can be created by altering the standard presentation.
Special effects are used to create illusions.

**Essential Questions:**
What equipment is currently industry standard?
What are the differences between basic editing techniques and intermediate editing techniques?
How can different editing technique change the genre and message of a video?
How can I alter the image?
What are special effects?
What are illusions?

**Unit Goals:**
At the conclusion of this unit, students will be able to:
Demonstrate knowledge of what current and past technology was used to create special effects.
Demonstrate knowledge of how to use industry standard/prosumer editing special effects software.
Create a special effects video using industry standard/prosumer editing special effects software.

**Recommended Duration:** 1 week

6 - Basic Stop Motion Techniques

**Unit Plan**

**Enduring Understandings:**
There are many steps to planning a successful production. Editing techniques can be purposefully applied to enhance the work of art and influence the message. Something visually appealing and interesting can be created by altering the standard presentation. Sound can be used to enhance the emotion evoked in an audience. Viewing and analyzing other people's work, as well one's own gives insight into one's art.

**Essential Questions:**
What are the different steps in planning?
In what order do you complete the different steps?
Are there different ways to complete the planning steps?
What are the differences between basic editing techniques and intermediate editing techniques?
Does editing software change the kind of editing techniques that can be accomplished?
How can different editing techniques change the genre and message of a video?
What is visually appealing?
How can I alter the image?
How do I technically alter the image?
What camera techniques can I use to alter an image?
What editing techniques can I use to alter an image?
How does sound affect emotion?
Do different sounds evoke different feelings?
What sounds evoke what feelings?
How has film techniques changed over the years?
How can new film techniques evoke different emotions from old techniques?
What factors contribute to a film's success?

**Unit Goals:**
At the conclusion of this unit, students will be able to:
Demonstrate knowledge of the evolution of stop motion and key people in the industry.
Demonstrate the ability to plan the production of an original stop motion video.
Illustrate how to effectively use music and special effects to enhance a stop motion video.
Create an original stop motion video using production and editing techniques.

**Recommended Duration:** 2 weeks

LA.11-12.RST.11-12.2 Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.

LA.11-12.RST.11-12.3 Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.

LA.11-12.RST.11-12.4 Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11-12 texts and topics.

LA.11-12.RST.11-12.6 Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.

LA.11-12.RST.11-12.7 Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.

LA.11-12.RST.11-12.9 Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

LA.11-12.RST.11-12.10 By the end of grade 12, read and comprehend science/technical texts in the grades 11-CCR text complexity band independently and proficiently.

LA.11-12.WHST.11-12.2.a Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

LA.11-12.WHST.11-12.2.b Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.

LA.11-12.WHST.11-12.2.c Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.

LA.11-12.WHST.11-12.2.d Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).

LA.11-12.WHST.11-12.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LA.11-12.WHST.11-12.5 Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LA.13-12.WHST.11-12.7 Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

LA.13-12.WHST.11-12.9 Draw evidence from informational texts to support analysis, reflection, and research.

AR.9-12.1.2.12.A.1 Determine how dance, music, theatre, and visual art have influenced world cultures throughout history.

AR.9-12.1.2.12.A.2 Justify the impact of innovations in the arts (e.g., the availability of music online) on societal norms and habits of mind in various historical eras.

TEC.9-12.1 The use of technology and digital tools requires knowledge and appropriate use of operations and related applications.

TEC.9-12.8.1.12.A.2 Produce and edit a multi-page document for a commercial or professional audience using desktop publishing and/or graphical software.

WORK.9-12.9.1.12.1 The ability to recognize a problem and apply critical thinking and problem-solving skills to solve the problem is a lifelong skill that develops over time.

WORK.9-12.9.1.12.A.1 Apply critical thinking and problem-solving strategies during structured learning experiences.

WORK.9-12.9.1.12.A.2 Participate in online strategy and planning sessions for course-based, school-based, or outside projects.

WORK.9-12.9.1.12.B.1 Present resources and data in a format that effectively communicates the meaning of the data and its implications for solving problems, using multiple perspectives.

WORK.9-12.9.1.12.B.2 Create and respond to a feedback loop when problem solving.

WORK.9-12.9.1.12.B.3 Assist in the development of innovative solutions to an onsite problem by incorporating multiple perspectives and applying effective problem-solving strategies during structured learning experiences, service learning, or volunteering.

WORK.9-12.9.1.12.C.1 Enlist input from experts in the field, community members, and other stakeholders to design a service-learning activity that addresses a local, national, or worldwide need.

WORK.9-12.9.1.12.E.1 Create messages for different purposes and audiences with sensitivity to cultural, gender, and age diversity, using various digital media outlets.

WORK.9-12.9.1.12.F.2 Demonstrate a positive work ethic in various settings, including the classroom and during structured learning experiences.

ITEC.9-12.9.4.12.C.1 Demonstrate knowledge and understanding of how technical production support can enhance audio, video, and film production systems.

ITEC.9-12.9.4.12.C.2 Examine and summarize careers in this pathway to build an understanding of available opportunities.

ITEC.9-12.9.4.12.C.3 Employ knowledge and skills related to audio production equipment to demonstrate an understanding of basic tools used in this pathway.

ITEC.9-12.9.4.12.C.4 Employ knowledge and skills related to video production equipment to demonstrate an understanding of basic tools used in this pathway.

ITEC.9-12.9.4.12.C.5 Edit audio and video productions to demonstrate basic production system skills.

ITEC.9-12.9.4.12.C.6 Design an audio-video production to acquire an understanding of the entire production process.
Differentiation

Offer students extra time to continue work during free periods or after school; however, students should still be held to the due date and deadline set forth in the production schedule to reinforce workplace readiness skills.

Offer students the opportunity to work in groups to instill confidence and promote collaboration of ideas.

Technology

Students may decide to upload final stop motion videos to websites with feedback sections. Reading feedback from viewers is a way students can gain further insight into their art.

College and Workplace Readiness

This unit has a production schedule with assigned due dates and deadlines that the students must meet. The due dates and deadlines set forth in the production schedule are there to reinforce industry standards as well as college and workplace readiness skills.
Enduring Understandings:
There are many steps to planning a successful production.
A reliable and talented crew and cast will lead to a successful production.
An effective director knows how to communicate his needs to those he works with.
Editing techniques can be purposefully applied to enhance the work of art and influence the message.
Something visually appealing and interesting can be created by altering the standard presentation.
Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with.

Essential Questions:
What are the different steps in planning?
In what order do you complete the different steps?
Are there different ways to complete the planning steps?
What are qualities of a reliable crew?
What do you look for in a talented cast member?
What qualities does an effective director possess?
How does a director communicate effectively?
What are the differences between basic editing techniques and intermediate editing techniques?
Does editing software change the kind of editing techniques that can be accomplished?
What is visually appealing?
How do you make efficient decisions?
What is problem solving?
What creates credibility in the field of production?

Unit Goals:
At the conclusion of this unit, students will be able to:
Demonstrate knowledge of how to create a proper treatment.
Demonstrate knowledge of the four stages of production in a field production: pre-production, set-up and rehearsal, production, and post-production.
Demonstrate knowledge of how to create a storyboard and location shot sheet for an original music video.
Understand the importance of a production schedule.
Create numerous types of production schedules.
Create and follow numerous types of production schedules.
Understand the role of a strong leader in a group and the role of a strong group member.
Demonstrate knowledge of the evolution of music videos.
Create an original music video using proper production and editing techniques.

Recommended Duration: 3 weeks

WORK.9-12.9.1.12.C.5 Assume a leadership position by guiding the thinking of peers in a direction that leads to successful completion of a challenging task or project.
WORK.9-12.9.1.12.C.6 Create messages for different purposes and audiences with sensitivity to cultural, gender, and age diversity, using various digital media outlets.
WORK.9-12.9.1.12.F.2 Demonstrate a positive work ethic in various settings, including the classroom and during structured learning experiences.
ITEC.9-12.9.12.C.1 Demonstrate knowledge and understanding of how technical production support can enhance audio, video, and film production systems.
ITEC.9-12.9.12.C.2 Examine and summarize careers in this pathway to build an understanding of available opportunities.
ITEC.9-12.9.12.C.3 Employ knowledge and skills related to audio production equipment to demonstrate an understanding of basic tools used in this pathway.
ITEC.9-12.9.12.C.4 Employ knowledge and skills related to video production equipment to demonstrate an understanding of basic tools used in this pathway.
ITEC.9-12.9.12.C.5 Edit audio and video productions to demonstrate basic production system skills.
ITEC.9-12.9.12.C.6 Design an audio-video production to acquire an understanding of the entire production process.
## Differentiation

In creating one's music video, students may choose a genre and appropriate song that interests them. They have creative license in the way in which they interpret the song. Even if multiple students choose the same song, each student will have a different vision and resulting video. Students are also able to create their own timeline of production.

## Technology

Students may apply the learned ability to use different and appropriate technologies and techniques available to complete any type of project.

## College and Workplace Readiness

The production of a music video requires students to use skills that they will need in their daily lives as well as in any school or workplace setting. Students must plan efficiently, set specific goals, and adhere to a schedule in reaching these goals. They must effectively communicate with others and balance strong leadership with teamwork. The ability to reflect on one's work and actions is also a required component of the unit and an essential life skill.
8 - Basic Documentary Techniques

**Unit Plan**

**Enduring Understandings:**
There are many steps to planning a successful production.
Different demographic audiences have different needs.
Editing techniques can be purposefully applied to enhance the work of art and influence the message.
One must consider many factors to determine the best way to sell one's vision of a production.
Sound can be used to enhance the emotion evoked from an audience.

**Essential Questions:**
What are the different steps in planning?
In what order do you complete the different steps?
Are there different ways to complete the planning steps?
How do you cater presentations towards a specific demographic?
What are the differences between basic editing techniques and intermediate editing techniques?
Does editing software change the kind of editing techniques that can be accomplished?
How do you know which way is best to communicate your idea?
Do different sounds evoke different feelings?
What sounds evoked what feelings?

**Unit Goals:**
At the conclusion of this unit, students will be able to:
Demonstrate knowledge of the different styles and elements of documentaries.
Demonstrate knowledge of the four stages of production in a field production: pre-production, set-up and rehearsal, production, and post-production.
Demonstrate knowledge of how to write a script for a documentary.
Understand the importance of a proper research.
Demonstrate knowledge of the flexible scheduling and planning.
Create an original documentary using proper production and editing techniques.

**Recommended Duration:** 2 weeks

</table>
Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.

Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.

Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11-12 texts and topics.

Analyze the author’s purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.

Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

By the end of grade 12, read and comprehend science/technical texts in the grades 11-CCR text complexity band independently and proficiently.

Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.

Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.

Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Draw evidence from informational texts to support analysis, reflection, and research.

Determine how dance, music, theatre, and visual art have influenced world cultures throughout history.

Justify the impact of innovations in the arts (e.g., the availability of music online) on societal norms and habits of mind in various historical eras.

The use of technology and digital tools requires knowledge and appropriate use of operations and related applications.

Produce and edit a multi-page document for a commercial or professional audience using desktop publishing and/or graphic software.

The ability to recognize a problem and apply critical thinking and problem-solving skills to solve the problem is a lifelong skill that develops over time.

Apply critical thinking and problem-solving strategies during structured learning experiences.

Participate in online strategy and planning sessions for course-based, school-based, or outside projects.

Present resources and data in a format that effectively communicates the meaning of the data and its implications for solving problems, using multiple perspectives.

Create and respond to a feedback loop when problem solving.

Participate in the development of innovative solutions to an onsite problem by incorporating multiple perspectives and applying effective problem-solving strategies during structured learning experiences, service learning, or volunteering.

Enlist input from experts in the field, community members, and other stakeholders to design a service-learning activity that addresses a local, national, or worldwide need.

Demonstrate a positive work ethic in various settings, including the classroom and during structured learning experiences.

Demonstrate knowledge and understanding of how technical production support can enhance audio, video, and film production systems.

Examine and summarize careers in this pathway to build an understanding of available opportunities.

Employ knowledge and skills related to audio production equipment to demonstrate an understanding of basic tools used in this pathway.

Employ knowledge and skills related to video production equipment to demonstrate an understanding of basic tools used in this pathway.

Edit audio and video productions to demonstrate basic production system skills.

Design an audio-video production to acquire an understanding of the entire production process.
### Differentiation

All students will be creating a documentary, but the topics, planning strategies, and techniques used will differ with each student.

### Technology

Students will be able to apply documentary techniques to a variety of informative multimedia presentations or streaming video.

### College and Workplace Readiness

The research and writing skills necessary to create a documentary are skills that can be applied to multiple fields of study and work. The ability to fact check and clearly present one's ideas are important skills. In addition, learning how to create one's schedule and manage one’s time are necessary skills for everyone.
Enduring Understandings:
There are many steps to planning a successful production. A reliable and talented crew and cast will lead to a successful production. An effective director knows how to communicate his needs to those he works with. Editing techniques can be purposefully applied to enhance the work of art and influence the message. Employers will look for efficient decision makers and problem solvers who are experienced and easy to work with.

What are the different steps in planning? 
In what order do you complete the different steps? 
Are there different ways to complete the planning steps? 
What are the qualities of a reliable crew? 
What do you look for in a talented cast member? 
What qualities does an effective director possess? 
How does a director communicate effectively? 
What are the differences between basic editing techniques and intermediate editing techniques? 
Does editing software change the kind of editing techniques that can be accomplished? 
How can different editing techniques change the genre and message of a video? 
How do you make efficient decisions? 
What is problem solving? 
What creates credibility in the field of production?

Unit Goals:
At the conclusion of this unit, students will be able to: 
Demonstrate knowledge of the four stages of production in a field production. 
Demonstrate knowledge of how to properly brainstorm ideas for a field production. 
Demonstrate knowledge of how to create a proper treatment. 
Demonstrate knowledge of how to create a script and storyboard for an intermediate field production video. 
Understand the importance of a production schedule. 
Create numerous types of production schedules. 
Understand the role of a strong leader in a group and the role of a strong group member. 
Demonstrate knowledge of intermediate editing techniques. 
Create an original video of choice. 

Recommended Duration: 3 weeks

<tr>
<th>Guiding/Topical Questions</th>
<th>Content/Themes/Skills</th>
<th>Resources and Materials</th>
<th>Suggested Strategies</th>
<th>Suggested Assessments</th>
</tr>
</thead>
<tbody>
<tr>
<td>What needs to be accomplished during the first stage of production (pre-production)?</td>
<td>Develop a concept/idea</td>
<td>Blank paper and writing utensils</td>
<td>Create and propose an independent field production video concept</td>
<td>Treatment</td>
</tr>
<tr>
<td></td>
<td>Develop a treatment proposal</td>
<td>Computer with word processing software</td>
<td>Create a scripted storyboard for an independent field production video concept</td>
<td>Script</td>
</tr>
<tr>
<td></td>
<td>Create a script and storyboard</td>
<td></td>
<td></td>
<td>Storyboard</td>
</tr>
<tr>
<td>What needs to be accomplished during the second stage of production (set-up and rehearsal)?</td>
<td>Demonstrate knowledge of location scouting</td>
<td>Blank paper and writing utensils</td>
<td>Create a location shot sheet</td>
<td>Detail and clarity of location shot sheets</td>
</tr>
<tr>
<td></td>
<td>Develop a location shot sheet</td>
<td>Block camera and talent based upon student created floor plans</td>
<td></td>
<td>Student created floor plans in consideration of talent and camera blocking</td>
</tr>
<tr>
<td></td>
<td>Illustrate ability to create a shooting schedule</td>
<td>Design a shooting schedule</td>
<td></td>
<td>Individual ability to create a production schedule as well as met set deadlines</td>
</tr>
<tr>
<td></td>
<td>Demonstrate knowledge of talent/camera blocking</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>What needs to be accomplished during the third stage of production (production)?</td>
<td>Demonstrate ability to use industry standard/prosumer video camera</td>
<td>Industry standard video camera</td>
<td>Complete all the necessary filming</td>
<td>Performance directing their independent field production video</td>
</tr>
<tr>
<td></td>
<td>Demonstrate knowledge of responsibilities of a director</td>
<td>Various production equipment (light kit, tripod, etc.)</td>
<td>Direct and work with talent and crew to complete the production stage</td>
<td>Performance using proper camera techniques and shot set-ups</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>What are the different ways to communicate to and work with talent and crew members?</td>
<td>Demonstrate understanding of industry jargon/terminology</td>
<td>Multimedia presentation</td>
<td>Work with talent and crew members during the production</td>
<td>Performance working with talent and crew members during the production</td>
</tr>
<tr>
<td></td>
<td>Indicate knowledge of appropriate usage regarding industry language</td>
<td></td>
<td></td>
<td>Peer critiques</td>
</tr>
<tr>
<td>What is a production schedule?</td>
<td>Demonstrate ability to revise a production schedule as necessary</td>
<td>Computer with word processing software</td>
<td>Follow and revise (as needed) previously created production schedule</td>
<td>Production revisions and deadline achievement</td>
</tr>
<tr>
<td>Why is time management important?</td>
<td>Indicate awareness of timelines and importance of schedules in accordance with production schedules</td>
<td>Reflection of experiences working with a timeline</td>
<td>Reflection</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Meet preset production expectations</td>
<td>Accomplishment of task, including awareness and response to necessary adjustment</td>
<td></td>
</tr>
<tr>
<td>What techniques can be used to solve problems?</td>
<td>Demonstrate knowledge of process of elimination to problem solve</td>
<td>Computer with word processing software</td>
<td>Reflection on time management and project responsibility</td>
<td>Reflection</td>
</tr>
<tr>
<td></td>
<td>Production related equipment</td>
<td>Production related equipment</td>
<td></td>
<td>Teacher observed performance of students problem solving during production</td>
</tr>
<tr>
<td>What needs to be accomplished during the fourth stage of production (post-production)?</td>
<td>Demonstrate knowledge of how to use industry standard/prosumer editing software</td>
<td>Computer equipped to run industry standard editing software</td>
<td>Edit independent field production video</td>
<td>Performance using editing software</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Final production of their independent field production video</td>
<td></td>
</tr>
</tbody>
</table>
Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.

Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.

Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11-12 texts and topics.

Analyze the author’s purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.

Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

By the end of grade 12, read and comprehend science/technical texts in the grades 11-CCR text complexity band independently and proficiently.

Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.

Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.

Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Draw evidence from informational texts to support analysis, reflection, and research.

Determine how dance, music, theatre, and visual art have influenced world cultures throughout history.

Justify the impact of innovations in the arts (e.g., the availability of music online) on societal norms and habits of mind in various historical eras.

The use of technology and digital tools requires knowledge and appropriate use of operations and related applications.

Produce and edit a multi-page document for a commercial or professional audience using desktop publishing and/or graphic software.

Apply critical thinking and problem-solving strategies during structured learning experiences.

Participate in online strategy and planning sessions for course-based, school-based, or outside projects.

Present resources and data in a format that effectively communicates the meaning of the data and its implications for solving problems, using multiple perspectives.

Create and respond to a feedback loop when problem solving.

Assist in the development of innovative solutions to an onsite problem by incorporating multiple perspectives and applying effective problem-solving strategies during structured learning experiences, service learning, or volunteering.

Enlist input from experts in the field, community members, and other stakeholders to design a service-learning activity that addresses a local, national, or worldwide need.

Demonstrate leadership and collaborative skills when participating in online learning communities and structured learning experiences.

Create messages for different purposes and audiences with sensitivity to cultural, gender, and age diversity, using various digital media outlets.

Demonstrate a positive work ethic in various settings, including the classroom and during structured learning experiences.

Demonstrate knowledge and understanding of how technical production support can enhance audio, video, and film production systems.

Examine and summarize careers in this pathway to build an understanding of available opportunities.

Employ knowledge and skills related to audio production equipment to demonstrate an understanding of basic tools used in this pathway.

Employ knowledge and skills related to video production equipment to demonstrate an understanding of basic tools used in this pathway.

Edit audio and video productions to demonstrate basic production system skills.

Design an audio-video production to acquire an understanding of the entire production process.
Differentiation

This unit represents an end-of-course culminating project. Since students make an individual choice on what genre their culminating project will follow, students will address enduring understandings and essential questions in different ways. Schedules and deadlines will be different for each student to allow the appropriate amount of time for the individual culminating project. Students will be offered extra times to work during free periods or after school; however, students should still be held to the due dates and deadlines set forth in their schedules to reinforce workplace readiness skills.

Technology

Students will have the opportunity within this unit to utilize any of the technology previously taught within this course. The flexibility of this project allows students to take the initiative and attempt to try other technology not covered in the course to enhance their work.

Students will have access to user manuals and internet help associated with industry standard/prosumer equipment and software to allow them to research and experiment with other technical concepts and techniques.

College and Workplace Readiness

Creating and planning a large scale project requires skills that will be utilized in all areas of life, study, and work. Brainstorming, scheduling, and following through with ideas and plans are essential to making any project or undertaking a success.
# Intermedide Film Studies

## Unit Plan

### Enduring Understandings:
- Viewing and analyzing other people's work, as well one's own gives insight into one's art.

### Essential Questions:
- How have film techniques changed over the years?
- How can new film techniques evoke different emotions from old techniques?
- What factors contribute to a film’s success?

### Unit Goals:
- At the conclusion of this unit, students will be able to:
  - Demonstrate the ability to give constructive criticism and discuss various works of art.
  - Understand the importance of viewing works of art with an open mind.
  - Create their own personal opinions about films that are considered great classics.
  - Demonstrate knowledge of how technology has influenced film making.

### Recommended Duration: 4 weeks infused throughout the year

Introduction

Determine

Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).

Justify

Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.

Use

Examine and summarize careers in this pathway to build an understanding of available opportunities.

Develop

Demonstrate knowledge and understanding of how technical production support can enhance audio, video, and film production systems.

Produce

Explain how dance, music, theatre, and visual art have influenced world cultures throughout history.

LA.11-12.WHST.11-12.2.a

Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings, graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

LA.11-12.WHST.11-12.2.b

Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.

LA.11-12.WHST.11-12.2.d

LA.11-12.WHST.11-12.2.e

LA.11-12.WHST.11-12.4

LA.11-12.WHST.11-12.7

LA.9-12.1.2.12.A.1

LA.9-12.1.2.12.A.2

AR.9.4.12.C.1

AR.9.4.12.C.2

Justify

Demonstrate how dance, music, theatre, and visual art have influenced world cultures throughout history.

Student differentiated work

Differentiation

Student opinions will vary from film to film. As students continue to learn and develop, they may find their own opinions changing as well. The way in which they present their opinions to the class may vary with each project (e.g. written critiques, multimedia presentations).

Technology

Students will use a word processor or other productivity suite to organize their opinions and critiques. They may also use other forms of streaming media to find examples to support their ideas. Knowledge of these programs has become more essential in the workforce.

College and Workplace Readiness

Throughout the year students will practice listening and evaluation skills. They will learn to provide constructive critiques and form well-supported opinions. Students will compare and contrast ideas and techniques and make informed decisions based on these comparisons. These aural and evaluative skills are desirable in all life situations.
