Course Philosophy

The mission of the Freehold Regional High School District is to develop global lifelong learners through a comprehensive educational program of diverse and enriching opportunities within a supportive environment. The district's educational community fosters the development of character, initiative, creativity and excellence while maximizing the unique potential of each individual.

The Law Enforcement and Public Safety Career Academy epitomizes the district's mission by providing accepted students with opportunities to study four major areas; law enforcement, fire science, emergency management services and homeland security. The goal is to equip students with the knowledge, skills, values, and attitudes needed to succeed in the public safety arena.

The Law Enforcement and Public Safety Career Academy employs an interdisciplinary approach which includes English, social studies, Spanish, mathematics, science, physical education and fine arts. These courses will build upon each other in order to assist students in understanding the various skills for dealing with our society's diverse needs and population.

The goal of this curriculum is to prepare students for the physical rigors necessary to effectively function in the law enforcement and public service sector. Instructors will use innovative instructional methods reflecting best practices and assist students in developing lifelong skills that will help create active citizens in a democratic society. This course will provide each student with the tools to develop an individual optimum level of physical fitness, acquire knowledge of physical fitness concepts and understand the significance of lifestyle on one's health and fitness.

Course Description

LEPS Physical Education IV is the final physical education courses designed to engage students in preparing for the physical and mental requirements of law enforcement agencies and fire fighting and other public service programs such as Homeland Security. Students completing this course will undergo physical training exercises for three marking periods. Meetings, tutorials and guest speaker presentations will be as needed throughout the year. Drill and ceremony exercises will be two times a month for the whole year. Each learning experience will require students to be active participants, critical thinkers, effective communicators and disciplined listeners.
